

## ***Supply & Demand Chain Executive Magazine Showcases AIM Computer Solutions / The Grant Group Case Study***

Fraser, MI – August 10, 2005 – *Supply & Demand Chain Executive* recently showcased The Grant Group case study which highlights AIM Computer Solutions' focused attention on production part mandates and standards.

AIM Computer Solutions, Inc. was recently awarded Top 100 Recognition by *Supply & Demand Chain Executive*. S&DCExec identified a list of the top supply and demand chain initiatives at small, midsize and large companies in a variety of industry sectors, highlighting the pain point(s) addressed by the initiatives (The Challenge), the technologies and services used to address those pain points (The Solution), the results of the initiatives (Return on Investment, or ROI), and plans for taking the project forward (Next Steps).

This case study focuses on the successful completion and innovative real-life supply chain implementation of the AIM Vision<sup>®</sup> software at The Grant Group, consisting of Grant Industries, Inc., Press-Way, Inc. and Eagle Assemblies, Inc. in Fraser and Clinton Township, Michigan.

*"We are very pleased with Supply & Demand Chain Executive Magazine's decision to publish and showcase the Grant story." says Jeff Siciliano, President of AIM Computer Solutions, Inc. "The S&DCExec's article focuses on The Grant Group's history of leveraging AIM technology to evolve and grow."*

Their challenges involved growing their manufacturing business without adding additional resources, managing outside operations, meeting all TS16949 requirements and automotive mandated AIAG standards for barcode labels and while reducing overhead.

### **About AIM Computer Solutions, Inc.**

Michigan-based AIM has grown into the leader for a complete software solution for small to medium sized automotive suppliers. AIM Vision<sup>®</sup> provides a single source for automotive EDI integration into production scheduling complete with demand smoothing to accommodate work schedules, machine repair/refurbish, and other scheduling considerations. "Frozen" demands are then used to generate MRP and CRP reports, fully synchronized with Tier 1 and transportation customer requirements. Other capabilities include outside processing, lot control, finite scheduling, and two levels of tool/workstation scheduling logic, barcode label generation and significant use of operator friendly edit and validation aids. Complete integration into Microsoft<sup>®</sup> Financials, SQL and new SharePoint technologies extends the AIM Vision<sup>®</sup> solution throughout the supply chain.

### **About Supply & Demand Chain Executive**

*Supply & Demand Chain Executive* is the executive's user manual for successful supply chain transformation, utilizing hard-hitting analysis, viewpoints and unbiased case studies to steer supply and demand chain management professionals through the complicated, yet critical, world of supply and demand chain management as competitive advantage.
